COOKIE POLICY

What are cookies?

Cookies are small text files containing a string of characters that can be placed on your computer or mobile device that uniquely identify your browser or device.

What are cookies used for?

Cookies allow a site or services to know if your computer or device has visited that site or service before. Cookies can then be used to help understand how the site or service is being used, help you navigate between pages efficiently, help remember your preferences, and generally improve your browsing experience. Cookies can also help ensure marketing you see online is more relevant to you and your interests.

What types of cookies does Aidbox use?

There are generally four categories of cookies: “Strictly Necessary,” “Performance,” “Functionality,” and “Targeting.” Our use of the four types of cookies on our site varies. You can find out more about each cookie category below.

Strictly Necessary Cookies. These cookies are essential, as they enable you to move around our site and use its features, such as accessing logged in or secure areas.

Performance Cookies. These cookies collect information about how you have used our site, for example, information related to the unique username you have provided, so that less strain is placed on our backend infrastructure. These cookies may also be used to allow us to know that you have logged in so that we can serve you fresher content than a user who has never logged in. We also use cookies to track aggregate usage and experiment with new features and changes on our site. The information collected is used to improve how our site works.

Functionality Cookies. These cookies allow us to remember how you’re logged in, when you logged in or out, and the state or history of tools you’ve used. These cookies also allow us to tailor our site to provide enhanced features and content for you. The information these cookies collect may be anonymous, and they are not used to track your browsing activity on other sites or services.

Targeting Cookies. Our third-party partners may use these types of cookies to deliver advertising that is relevant to your interests. These cookies can remember that your device has visited a site or service, and may also be able to track your device’s browsing activity on other sites or services other than Aidbox. This information may be shared with organizations outside Aidbox, such as advertisers and/or advertising networks to deliver the advertising, and to help measure the effectiveness of an advertising campaign, or other business partners for the purpose of providing aggregate usage statistics and aggregate testing.

How long will cookies stay on my device?

The length of time a cookie will stay on your computer or mobile device depends on whether it is a “persistent” or “session” cookie. Session cookies will only stay on your device until you stop browsing. Persistent cookies stay on your computer or mobile device until they expire or are deleted.

First and third-party cookies

First-party cookies are cookies that belong to Aidbox, third-party cookies are cookies that another party places on your device through our site. Third-party cookies may be placed on your device by someone providing a service for Aidbox, for example to help us understand how our site is being used. Third-party cookies may also be placed on your device by our business partners so that they can use them to advertise products and services to you elsewhere on the Internet.

How to control and delete cookies

You can control, delete, and disable cookies by following through your web browser settings. You can follow the instructions on your browser’s help page or their website to remove the cookies set by our site and other sites. You can also choose to block our site and other sites from setting these cookies in the future. Note that if you set your browser to disable cookies, your experience on our site may be affected.
